## **Karaoke** - £10.00 extra

Karaoke can be added to any of our packages. This includes professional radio mics with reverb and a growing selection of over 8,000 songs to sing.

## **Earlier Set Up** - £25.00 per hour

Appropriate for Weddings & Dinner Dances etc. An earlier installation of discotheque equipment prior to the reception will not only avoid that lengthy lull between when you finish and we commence, but will allow for the playing of background music during your wedding breakfast or dinner. The use of microphones is then available for speeches, which enable the speaker to be heard clearly in a room of any size.

## **Smoke Machine** - £10.00

Smoke machines greatly enhance any lighting by causing the beams to stand out. The addition of fog makes lights appear almost solid and columned, while greatly punctuating the effect of strobes and effects. Use of smoke machines is dependent on permission from venue, as they can interfere with modern fire detection & suppression systems.

## **Playing Time**

A standard set is 4 hours. Any further time will be charged at our nominal rate of £50 per hour.
